

Quality. Timeliness. Value

www.intechdesigns.com

INTERVIEW WITH THE CHAIRMAN

Intech Designs as a company was established in 2000 when as a General Contractor Mr. Alva was unhappy with the quality of deliverables that accompanied most projects.

So he went about creating an engineering company from scratch. This company while understanding the requirements of both the fabrication shop and on-site projects, came up with methodologies to create error-free outputs on time, every time.

So much so, in a short while, Intech gained the reputation of being one of the few companies worldwide, where assignments went directly into production, with a historical error rate of less than 0.001% of the sale price.

This was backed with policies that ensure a conducive work environment and motivated staff who took responsibility in all what they do.

Good, business practices & corporate governance, executed by a dedicated workforce has ensured Intech's consistent worldwide performance, in all spheres connected with engineering.

WELCOME TO INTECH DESIGNS

Welcome! Intech Designs is a twenty-first-century steel building brand which specializes majorly in Pre-engineered Metal Building Services. Our expertise lies in computer-aided designs, Structural Steel Building Detailing and Engineering CAD drafting solutions for metal building manufacturers who are for the most part members of the Metal Building Manufacturers Association (MBMA).

OUR VISION

At Intech Designs, our mission is providing engineering service of highest quality & value, on time all the time.

OUR MISSION

Our Vision is to create a means by which Steel fabricators across the globe would enjoy world-class Steel Building Services of the highest quality at an affordable cost and within workable timeframes.

WHY WORK WITH **US**?

Are you a Metal Building manufacturer or Steel fabricator wondering why you should work with Intech Designs?

Established almost two decades ago, our brand has over the years gathered the needed excellence to offer our clients only the best in terms PEB Design, Structural Steel Drafting and Detailing of Pre-Engineered Metal Buildings and other Steel Building Services.

Contact us today and let us take an expert look into your existing project and you would be glad you did! We deliver more value than our price and this approach has kept us in business over the years.

OUR SERVICES

Metal Buildings and Steel construction in the twenty-first century require an immense amount of focus on detailing and design. It is of great importance that Architects, Contractors, Builders, Metal Building Manufacturers and other professionals involved in the process of Steel building and construction enjoy top-notch steel pre-engineering and detailing services with quick turnarounds and without a compromise on quality.

- **Metal Building Designing**
- **Structural Steel Detailing**
- **Walk Through Animations**

Intech offers professional top quality Pre-engineered Metal Building services by using cutting-edge methods and Computer-aided software. With the utilization of advance steel detailing computer software, we provide exceptional pre-engineered Metal Building & Structural Steel deliverables.

METAL BUILDING DESIGNING

In the making of top-quality pre-engineered metal building designs, there is an immense amount of focus and precision required during this stage. As experienced engineers who are professional designers, we utilize advanced system software to design commercial steel structures that are optimized in weight and are according to Federal, State and County codes and regulations.

Given our robust technical know-how, we pay close attention to the geographical factors involved in the construction process such as the type of soil, seismic zoning.

At Intech, our work is highly dependent on this stage as once the designing of the Pre-Engineering Metal Building is completed, the designs with basic drafting deliverables would have to go to the Metal manufacturer. Between the Manufacturer and Customer, changes if any would be incorporated before submission to the concerned authorities for approval. Once completed, the deliverables can then proceed through to other stages.

STRUCTURAL STEEL DETAILING

Once a client & the Metal Building Manufacturer have approved a PEB steel building design, it is important that a more detailed representation be expressed. Dimensions and measurements have to be stated in order to become more precise for fabrication.

At Intech, we specialize in professional Structural Steel Detailing & CAD Drafting of Metal Building deliverables. Assigning appropriate measurements, dimensions and other specifications in the design to produce Shop Drawings for Steel fabrication. Being a delicate process in itself, it requires a keen attention to details, as it is important that only experienced professionals handle the Detailing of Prefabricated Metal Buildings.

As Structural Steel Detailing is our forte, we have gained a reputation of being one of the few companies worldwide, where assignments go directly into production, with a historical error rate of less than 0.001% of the sale price

WALKTHROUGH ANIMATIONS

In the presentation of deliverables, it is very important that clients fully understand the Pre-engineered Steel Building visual layout in order to ensure that proper adjustments and modifications are made before any further work is carried out. A very efficient way to achieving this is through the use of Walkthrough animations.

Walkthrough animations can be used to produce digital expressions that illustrate an animated outlook of the project such that clients can experience a visual sensation of how the Steel Building would appear after construction, while also ensuring that any obstructions, clashes of different services and or structural steel members are exposed and remedial measures taken as to rectification.

CORE VALUES

Intech Designs is a frontline brand that seeks to provide engineering services of the highest quality and value, on time all the time at a global level. Our work, which spans over almost two decades is guided by certain basic values and goals. We offer our services in the Metal Building industry by delivering over 10,000 tons per annum. At Intech Designs, we have eight fundamental values and goals.

EMPLOYEES

We take all our employees very seriously; creating an environment of equal employment values and efficient reward schemes to appreciate the hard work of our employees, dedication, and attention to detail.

PROFESSIONALISM

At Intech Designs, we are dedicated to achieving our set targets and goals at the earliest time possible and at optimal costs. We work hard to ensure that our clients are well treated by our staff whose orientation is highly professional.

QUALITY

Being one of our major watchwords, we ensure that we give only the best in any project we are on. Giving our clients the assurance that they can get only the best from us when it comes to the quality.

DELIVERY

We understand the importance of timeliness in professionalism and this is why we are set out to always deliver our projects in stipulated time-frame. As we put it, we are on time, every time!

CLIENTS

Understanding the importance of our clients in the course of our work, we always strive to ensure that we meet all the expectations of our clients as regarding a particular project in the most efficient manner.

CUTTING EDGE TECHNOLOGY

Technology is a very dynamic field of science and understanding this fact, we have designed our brand to be flexible such that we can easily adopt new and cutting-edge technological developments in our work.

ENVIRONMENT

We provide a safe and convenient workspace for all our employees to ensure a workable and ambient work atmosphere to optimize their efficiency.

CAPACITY AND CAPABILITIES

Based on the demands of a project, we can adopt newer methods to improve our capacities and capabilities towards the execution of such project. This can be achieved in due course.
